

TrekIndia

100 NEW Trekking Companies & Operators — All India

A fifth operator set intended to expand TrekIndia's company coverage across the Himalayan belt, Western Ghats, Central India, Rajasthan/Gujarat and North-East India. These are additional discovery candidates and are not meant to be attached automatically to every trek.

Count	100 additional operator/company records.
Geographic mix	Ladakh, Kashmir, Himachal Pradesh, Uttarakhand, Maharashtra, Karnataka, Kerala, Tamil Nadu, Rajasthan, Gujarat, Madhya Pradesh, Chhattisgarh and North-East India.
Database use	Use these to expand TREK → COMPANY_TREKS relationships after route-level verification.
Quality rule	A regional operator is not automatically a trek operator. Store the exact trek-page URL, operator trek name and verification status for every relationship.

100 Operator Directory

#	Company / Operator	Official site	Region	Representative treks / routes
1	Rimo Expeditions	https://www.rimoexpeditions.com/	Ladakh / Himalayas	Markha Valley • Chadar • Stok Kangri region • Ladakh expeditions

TrekIndia Company Mapping Structure

The correct production relationship is many-to-many: one trek can have multiple companies and one company can conduct multiple treks. Do not attach all routes listed under an operator's regional coverage to the database without route-level evidence.

Field	Purpose
company_id	Unique company/operator record
trek_id	Existing TrekIndia trek record
company_name	Operator name
official_site_url	Official company website
specific_trek_url	Exact operator route page
operator_trek_name	Route name used by the operator
state / region	Trek operating region
operator_type	Dedicated trek operator / adventure company / local operator / tourism organization
verification_status	verified / needs_review / unavailable
last_verified_at	Last date the relationship was checked

Important Data Quality Rule

This PDF is an operator discovery set. Before a company is displayed as an active booking option on a TrekIndia trek card, verify that the company currently conducts that exact trek and save the specific trek URL as evidence. This prevents false company recommendations and makes the TrekIndia operator layer auditable.

Prepared for TrekIndia • 16 August 2026 • Additional India-wide discovery dataset. Route availability, permits, seasonal departures and exact company-trek relationships must be rechecked before production.
